TECHNICAL EXPERIENCE

JavaScript, ReactJS, Redux, Docker, AngularJS, Ionic, NodeJS, Bootstrap, Foundation, TypeScript, jQuery, HTML5, CSS3, JSON, MongoDB, AJAX, Git (GitHub and Stash), Front End Architecture, Gulp, Webpack

EXPERIENCE

Nevo Technologies, Software Engineer, Cambridge, MA
March/2017— January/2018
- Completely refactor a client's React app to improve structure and to use Redux and React Router
- Responsible for front end structure and application design decisions for green field React / Redux applications
- Responsible for ongoing client support, including bug fixes and new feature requests, for both front end (React, Redux) and back end (Node.js, TypeScript) code
-

Avigilon, Software Engineer, Somerville, MA
May/2016— November/2016
- Part of a two person team building the front end of a SaaS application in React / Redux
- Responsible for new features, enhancements, and bug fixes
- Responsible for many front end architecture technical design decisions

meQuilibrium, Front End Engineer, Boston, MA
October/2015— April/2016
- Responsible for new features, enhancements, and bug fixes in our AngularJS web app as well as our mobile app built using the Ionic framework
- Refactored our build process from Grunt to Gulp to increase speed and automate previously manual tasks
- Proposed and implemented an improved development and QA process utilizing a pull request-based approach to code review and merging
- Coached our project manager on Agile / Scrum methodologies and supported him in moving us towards a more agile workflow

Panera Bread, Web Developer, Needham, MA
October/2014— October/2015
- Designed and implemented API to supply data to our mobile site and iPhone app in NodeJS
- Refactored desktop ordering application to be responsive on mobile devices using AngularJS and Bootstrap
- Refactored CSS of mobile website to use Sass for better organization / maintainability
- Work on new features and bug fixes as a part of a team following agile practices, using JavaScript, AngularJS, NodeJS, Bootstrap, jQuery, and CSS

Vibram USA, Data Analyst, Concord, MA
June/2009— July/2013
- Created system to quantify returns data which is used to generate a report tracking monthly and year to date trends
- Managed weekly replenishment of website and retail store inventory
- Developed and implemented a from-scratch RMA system for dealer returns, allowing oversight and

management not previously possible

United States Fencing Association and NCAA, Referee, Local, Regional, and National
2006— Present
- Refereed bouts at North American Cups, Junior Olympics, and National Championships that help determine members of the US Olympic and World Championship teams
